Touch Pleasure Index and Fullness Index

Touch Pleasure Index (TPI) and Fullness Index (FI) were calculated according to the following formula:

$$TPI \text{ or } FI = \frac{d_1 + d_2 + d_3 + \dots + d_n}{D \times n}$$

where d is each assigned degree; D is the maximum possible degree and n is the number of estimators that have performed the test.

Degrees of sensorial experience test

Degree	Pleasure at the touch	Fullness
1	Very unpleasant	Very empty
2	Unpleasant	Empty
3	Slightly pleasant	Slightly full
4	Pleasant	Full
5	Very pleasant	Very full
