## **Online Resource 2**

**Fig. S2** Photo taken from Spot 3 which shows a framing square aligned with the centre of the digital graph chart along its y axis. This framing square was used to measure the image deformation on the photos taken by the headset's camera so that the measurements extracted from the photos could be corrected according to it

**Title:** Effect of marker position and size on the registration accuracy of HoloLens in a non-clinical setting with implications for high-precision surgical tasks

**Journal:** International Journal of Computer Assisted Radiology and Surgery
